Art Unit: 2816

1. Applicant's response filed on 9/20/05 has been received and entered in the case.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-3, 5, 7-14, 16-21 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hisaka in view of Williams et al.

See paragraph three of the previous office action for the details of this rejection.
4. Applicant's arguments filed on 9/20/05 have been fully considered but they are not persuasive.

Applicant's sole argument is that the above-noted combination of references does not meet the limitation of claim 1 "to increase a rate at which the output of the driver circuit switches toward the first voltage" is not persuasive. While applicant is correct that the voltage of node N13 rises gradually during a portion of the waveform in Hisaka's Fig. 2, there is also a portion of this waveform n13 which increases (i.e., the portion following

Art Unit: 2816

the gradually increasing portion). Therefore, the above-noted limitation is still met by Hisaka (whether taken alone or in combination with Williams et al).

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
